

## PDF in the Theory of Lipid Bilayers

Applications are invited for a postdoctoral position in the Department of Physics and Astronomy at the University of Manitoba to collaborate with Dr. Mark Whitmore in theoretical studies of lipid bilayers. Applicants interested in other work in soft materials will also be considered. Applicants must hold a Ph.D., have strong computational skills, and have done research in related areas such as theoretical condensed matter physics.

The position will be for one year, renewable for a second year. Interested applicants should send a CV, summary of former research and interests, and names and contact information of three referees to [mark\\_whitmore@umanitoba.ca](mailto:mark_whitmore@umanitoba.ca), web site [www.physics.umanitoba.ca/~whitmore/whitmore.html](http://www.physics.umanitoba.ca/~whitmore/whitmore.html)

Evaluation of applications will start August 15, 2009, and will continue until the position is filled.

Winnipeg is home to three universities, numerous arts organizations, professional sports teams, outstanding restaurants, and opportunities for all types of outdoor activities in all seasons. The University of Manitoba is one of Canada's largest universities, with nearly 30,000 students including approximately 3,000 graduate students. Further information can be found through <http://umanitoba.ca/>.

The University of Manitoba encourages applications from qualified women and men, including members of visible minorities, Aboriginal peoples and persons with disabilities. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. Application materials, including letters of reference, will be handled in accordance with the *Freedom of Information and Protection of Privacy Act* (Manitoba).
